Какие кошельки можно использовать для покупки токенов

Токены можно купить с помощью кошельков, которые поддерживают стандарт ERC20. Самые распространенные кошельки:

- MyEtherWallet
- Ethereum Wallet / Mist
- Parity

Не покупайте токены напрямую с бирж или обменников!

Создание кошелька

Для участия в распродаже вам необходим кошелек эфира с поддержкой ERC20. Если у вас такого нет, рекомендуется использовать <https://www.myetherwallet.com>.

1. Перейдите по ссылке <https://www.myetherwallet.com>

The screenshot shows the MyEtherWallet homepage with a red header bar containing the text "DON'T GET PHISHED, please! 🚫 Thank you! 😊" and links "1. BOOKMARK MYETHERWALLET.COM" and "2. INSTALL EAL or MetaMask or Cryptonite". Below the header is a dark blue navigation bar with the "MyEtherWallet" logo, version "3.21.15", language "English", gas price "Gas Price: 4 Gwei", and network "Network ETH (myetherwallet.com)". A note below the bar says "The network is really full right now. Check Eth Gas Station for gas price to use." The main content area has a light gray background. It features a large button "Create New Wallet" in the center. Above the button, the text "Enter a password" is displayed, followed by a password input field with the placeholder "Do NOT forget to save this!" and an eye icon for visibility. At the bottom of the form, there is a note: "This password encrypts your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet." Below the note are two small links: "How to Create a Wallet" and "Getting Started". To the right of the main form, there is a sidebar with a question mark icon. It contains the text "Already have a wallet somewhere?" followed by a list of options for connecting existing wallets: "Ledger / TREZOR / Digital Bitbox / Secalot: Use your hardware wallet. Your device is your wallet.", "MetaMask: Connect via your MetaMask Extension. So easy! Keys stay in MetaMask, not on a phishing site! Try it today.", "Jaxx / imToken: Use your Mnemonic Phrase to access your account.", and "Mist / Geth / Parity: Use your Keystore File (UTC / JSON) to access your account."

2. Введите надежный, но легко запоминаемый пароль. Нажмите "Create New Wallet/ Создать кошелек"
